TO THE GOVERNOR, MEMBERS OF THE LEGISLATURE,
AND THE PEOPLE OF THE STATE OF NEW MEXICO

The twenty-fourth annual financial report for the 74th fiscal year, ended June 30, 1986, is herewith submitted in accordance with Section 6-5-4, N. M. S. A., 1978 Compilation.

The report presents the financial transactions of the State of New Mexico both by individual agency account and in summarized form. Comparative balance sheets are included for each section of the report except Sections VII and VIII which restate data included elsewhere.

At the end of the 74th fiscal year, cash resources totaled \$7,361 billion representing an increase of \$.508 billion over the prior fiscal year. The gain in cash resources is due mainly to the increase in permanent funds held in trust for public schools and state agencies and the retirement funds held in trust for government employees' retirement benefits.

The unappropriated surplus balance in the state general fund increased from a beginning balance of \$21.9 million to \$43.0 million as a result of transfers from several funds. General Fund appropriations for the 74th fiscal year exceeded general fund revenues by \$22.3 million.

Respectfully submitted,

J. Gilbert Romero, Director
Financial Control Division

Max C. Baca, Assistant Director
Financial Control Division

Approved: -----
Willard Lewis, Secretary
Department of Finance & Administration

Gary Granere, Deputy Secretary
Department of Finance & Administration

GENERAL COMMENTS AND EXPLANATIONS

This report has been prepared from the records of the Financial Control Division. Data presented for individual accounts have been reconciled to the post-audit report where such was available. A number of state agencies receive and disburse funds through authorized bank accounts. Data related to these agencies were obtained from agency cash and budget reports submitted to the Department of Finance and Administration. Agencies receiving and disbursing funds through authorized bank accounts were as follows:

- Livestock Board
- Inter-Tribal Indian Ceremonial Association
- State Fair Commission
- Carrie-Tingley Hospital
- New Mexico Colleges and Universities
- Northern New Mexico State School
- New Mexico School for the Visually Handicapped
- New Mexico School for the Deaf
- Employment Security Department

Certain supplementary data not available from this division's records have been obtained from reports requested of individual agencies.

The accounting system for the State is on a modified accrual basis. However, with the current budget control system, outstanding encumbrances at the close of the fiscal year are being carried forward into the following fiscal year as a reserve.

Section I--Combined Funds

The combined funds statements are presented in order to furnish a composite picture of the State's financial operation. The combined balance sheet, as well as all other balance sheets in this report, is limited to presentation of cash assets with corresponding liabilities, reserves and surplus. It does not present fixed asset information. Cash on deposit with the treasurer represents the balances shown by this division's records; outstanding warrants are not presented as cash items.

Statements showing total receipts by source, total disbursements by group, and summarizing cash transactions are sub-divided into transactions handled through the State Treasurer and those handled through authorized bank accounts. To avoid duplication in presenting disbursements of taxes and appropriations from the state treasury to authorized bank accounts where these would be later shown as disbursements by agency, this type of transaction has been shown as an adjustment item in arriving at total net receipts and disbursements.

Because of differences in classification of expenditures regarding the institutions of higher learning, disbursements of these institutions have been shown in accordance with their special classifications and not as part of the regular source classification used for all other state agencies. However, revenues collected by these institutions have been properly classified in their appropriate source.

Differences between beginning cash balances of the current fiscal year as compared to ending cash balances of the prior fiscal year are due to audit changes made after close of the fiscal year.

In arriving at total state revenue for the year, the non-revenue receipts portion and charges for intra-state services of the cash receipts schedule should be excluded. While being cash receipts for the purposes of the schedule, these do not result in revenue to the state, merely an exchange of one type of asset for another. Likewise, the last ten classifications in the cash disbursements schedule, exclusive of prior year encumbrances paid, are disbursements but do not result in expenditure of state money.

Revenues collected by an agency and earmarked for its own operation are shown in the budgetary accounts portion of this report.

Section II--The General Fund

The liability shown as suspense items in the general fund balance sheet represents three major types of money: (a) general fund taxes paid under protest which are awaiting court action to determine disposition; (b) percentages of general fund taxes established as reserves for the purpose of making necessary refunds, and (c) items collected but their distribution yet undetermined at the end of the accounting period. Cash balances encumbered for unspent appropriations are funds appropriated during the year for a special purpose which purpose was still in process at the date of the report. Non-reverting cash balances were not appropriated during the year, but have been applied against appropriations made for a future fiscal year. The operating reserve is to be used only upon specific authorization of the Legislature in the event revenues fail to meet the level of authorized appropriations. The state support reserve is to be used to augment the appropriations for the basic state support, qualifications and classroom teacher experience and to insure that these appropriations are not reduced. The unappropriated surplus is the balance left in the "General Fund" after appropriations and reserve requirements have been met.

The statement presenting general fund receipts and disbursements compares actual data for a two year period. Also presented are the estimated general fund receipts for the 75th fiscal year and the appropriations as of the beginning of the 75th fiscal year. It should be noted that Mineral Leasing Funds, Federal Revenue Sharing Funds and Severance Tax Income Funds, which are considered as part of the General Fund, are included.

The statement of cash transactions in allotment accounts details activity by type of transactions as shown by this division's records. Included in the "Transfers to other accounts" column are assessments and charges made against a particular account for services performed by another account.

Section III--Special Revenue Funds

Subsidiary schedules on highway funds were formulated from reports obtained from the agency. Schedules on interest and retirement funds include interest and principal outstanding at the date of the report.

Section IV--Bond Funds

Bond funds represent the unexpended proceeds from bond issues. The individual statement of cash transactions summarizes the activity transacted during the year. The disbursements noted against bond issues for projects involving agencies with authorized bank accounts represent transfers of monies from the State Treasury to these bank accounts and not actual expenditures of funds.

Section V--Working Capital Funds

Working capital funds have been established either by legislative action or by executive order to finance operations of a service nature performed for other state agencies. The statement of cash transactions summarizes cash operations of the individual funds for the year.

Section VI--Trust and Agency Funds

Financial statements and supplementary information are presented on the State's permanent funds, pension funds and other trust and agency funds.

Section_VII--Budgetary_Accounts--Agency_Cash_Transactions

Summarized in this section are cash operations of agencies according to their budgetary structure as opposed to their account structure; i.e., a state agency may operate out of two or more cash accounts established for effective cash control, but its operations are consolidated into one budget report for the effective conclusion of the agency's plan of overall operation. These different accounts have been consolidated into one in this section in order to present a composite evaluation of the agency's operation compared to its budget structure. Agency receipts are classified by source in this section. Disbursements are divided into operating expenditures, unusual or non-recurring expenditures and non-operating disbursements.

Section_VIII--Budgetary_Accounts--Agency_Appropriation_Summaries

This section presents a composite report comparing amounts authorized to be used for specific purposes with amounts actually expended for those purposes. The legislative authorization column indicates the money amounts appropriated for specific purposes. The amounts authorized for expenditure by several agencies, such as licensing boards and agencies operating with dedicated funds, contain a provision for increasing these amounts through executive action in cases where an emergency is deemed to exist. In order to present the information desired by the legislature, these changes authorized by executive action are not reflected in the legislative authorization column. For this reason, expenditure amounts shown as exceeding the legislative authorization amount should not be construed to indicate an over-expenditure of an appropriation.

COMBINED FUNDS

Combined statements are presented in this section consolidating all financial transactions of the State for the year under review.

TOTAL STATE REVENUES

THE GENERAL FUND

The General Fund is comprised of all revenues not allocated to specific purposes by law or contractual agreement. Conversely, legislative appropriations not made from a specific source of revenue are financed from the General Fund.

The legislative appropriation made for public school purposes is made in total amounts from the General Fund with the provision that allotments from the general fund within the appropriation be reduced by the amount of revenues provided from earmarked school sources. For this reason, the corresponding appropriation to schools is being shown in total.

The General Fund is composed of various General Fund accounts, divided broadly into four classes of accounts. Receipts accounts are those accounts into which revenues containing General Fund revenues are deposited prior to distribution to proper funds. Allotment accounts are those governmental operations which are financed primarily from the General Fund. The appropriation accounts are control accounts into which General Fund revenues are distributed periodically and out of which periodic allotments are made to General Fund governmental operations. Finally, the suspense accounts represent revenues paid under protest or for other reasons, final disposition of which has not been resolved.

Agencies operated wholly or in part from General Fund revenues include those whose unspent appropriations revert to the General Fund at the end of the fiscal year and also those which are authorized to carry forward unspent appropriations to be applied against the appropriation for a future fiscal period. In our General Fund Summary Schedules, total appropriations are shown as disbursements from the General Fund and reverting unspent appropriations are shown as receipts to the General Fund.

The General Fund consists of the following accounts:

03-335	Common School Income
04-335	Current School
05-335	Mineral Leasing
08-335	State Support Reserve Fund
01-392	Operating Reserve Account
08-395	Severance Tax Income Fund
09-397	Appropriation Account
11-397	Federal Revenue Sharing Trust

SPECIAL REVENUE FUNDS

Special revenue funds are used to finance activities from the receipt of specific taxes or other revenues. These funds include highway operations financed from earmarked highway use taxes, licensing and regulatory board operations financed from licenses and registration fees and other operations from earmarked sources of revenue such as: Game and Fish, Land Office, and Park and Recreation Commission. Also included are accounts established to retire the state bonded indebtedness.

BOND FUNDS

Bond funds are used to account for proceeds of bond issues. Since most bond issues are multipurpose issues, proceeds of which will be spent by several different state agencies, bond proceeds are usually transferred to the disbursing agency only on work in progress basis. Funds not needed for immediate construction are invested in short-term securities.

WORKING CAPITAL FUNDS

Working capital funds are established to finance internal service activities rendered to the State's own departments. In addition, miscellaneous working capital funds are established to allow recovery of costs involved in furnishing copies of documents and reports to private individuals and companies.

TRUST AND AGENCY FUNDS

Trust funds are established to account for assets received and held by the State in the capacity of trustee or custodian. Agency funds are established to account for assets received and held by the State in its capacity as agent for individuals or other governmental units.

There are four sub-classifications in the trust and agency funds section. Endowment funds comprise the State Permanent Fund. Pension funds include the Public Employees Retirement Fund, Educational Retirement Fund, and other agency retirement systems. Guarantee deposits include miscellaneous cash performance bonds posted by individuals. Agency funds are subdivided into federal, local government and other agency funds.
